PROFESSIONAL SUMMARY

Full Stack Developer with close to 2 years of experience building scalable web applications and RESTful APIs using React.js, Node.js, and JavaScript (ES6+), with hands-on experience in JWT/OAuth authentication, MS SQL Server, and CI/CD deployments using Docker and Kubernetes. Proven record of measurable impact — faster API response times, higher test coverage, and shorter release cycles. Experienced in building React.js front-end applications across 3 projects using Redux and Context API for state management, with strong JavaScript, TypeScript, HTML5 and CSS3 skills.

TECHNICAL SKILLS

Front End: React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Context API, Responsive Design, TypeScript, Angular, State Management (Redux / Context API)

Back End / APIs: Node.js, RESTful APIs, CRUD, JWT & OAuth Authentication, Server-Side Logic Integration

Testing & Build: Jest, Mocha, Selenium, Cypress, React Testing Library (RTL) fundamentals, Webpack, Performance Optimization

Cloud & DevOps: Docker, Kubernetes, AWS EC2, CI/CD, GitHub Actions

Version Control & Tools: Git (branching, pull requests, code review), GitHub, VS Code, Postman, Bruno, Jira

Databases: SQL, MS SQL Server, PostgreSQL, MongoDB, Redis (NoSQL / caching)

Methodologies: Cross-team collaboration with Product, Design and QA

Mobile: React Native, Google Play Store deployment & release management

PROFESSIONAL EXPERIENCE

Full Stack Developer — Skoegle IoT Innovations Pvt. Ltd. *Oct 2024 – Sep 2026*

- Built and maintained responsive, high-performance web interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3, integrating with Node.js REST APIs and JWT/OAuth authentication end-to-end. Managed application state with Redux and Context API across multiple React projects, using TypeScript for type-safe code.
- Optimized applications for speed and scalability with Redis caching and tuned SQL/MS SQL Server queries, improving API response times by roughly 30%, and reduced production bundle size using Webpack and modern build tooling.
- Maintained code quality through regular pull request reviews on Git/GitHub, and raised test coverage using Jest and Selenium/Cypress test suites, cutting post-release bugs by an estimated 15%.
- Built dashboards and device-tracking interfaces supporting real-time monitoring for multiple concurrent devices, while tracking work in Jira. Used Redux for state management of live device data.
- Streamlined CI/CD and production deployment using GitHub Actions, Docker, and Kubernetes, cutting release cycle time by around 25%, while delivering multiple features over 2 years.

KEY PROJECTS

Skoegle IoT GPS Tracker Platform

- Built reusable React.js UI components and REST API integrations for device tracking, management, and JWT authentication; implemented Map API/GPS tracking for real-time location monitoring.
- Developed CRUD operations with SQL/PostgreSQL and Redis caching to reduce data-fetch latency; contributed to the React Native app, including builds deployed to the Google Play Store. Managed UI state with Redux.

Skofit Healthcare & Fitness Application

- Developed UI features displaying heart rate, SpO2, calories, and health-schedule data via REST APIs, with Redis-backed caching keeping the interface responsive under frequent real-time updates. Used Redux for centralized state management.

Patient Health Monitoring / Go-Live Platform

- Built front-end views and REST APIs for patient and connected medical device workflows, including fall-detection alerts, maintaining strong test coverage for a consistent user experience. Used Redux for state management across views.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science Engineering, MS Engineering College, Sadahalli | VTU | 2023 | Karnataka, India

CERTIFICATIONS

Java Certification | Python Certification
